SUMMARY

- Full Stack Developer with a strong background in development & **architecture** for leading product-based companies & startups, now building **AI Agents & LLM applications**.
- **10+ years** of experience working with an Agile mindset in cross-functional teams, delivering things on time.
- Open-Source Contributor: github.com/honey93. | Tech Blogger: honey93.github.io/blogs/
- Co-founded startups **EventQ & Potential** by contributing in Tech & Product from scratch.

SKILLS

Software Development

AI & Agents: LLM Apps (Claude / GPT), AI Agents, MCP (Model Context Protocol), A2A, RAG, Prompt Engineering, Tool Calling, LangChain.

Frontend: Vue.js, AngularJS, Angular 8, React, Bootstrap, JavaScript, TypeScript, Redux, Vuex, Nuxt (SSR), WebPack, Service Workers.

Backend: Node.js (Express, Koa), PHP (Laravel), Python (Flask), Java (Spring Boot), Serverless

Database & Cloud: MongoDB, MySQL, Postgres, Redis, IndexedDB, AWS (EC2, Containers, VPC, Lambda), Google Cloud

EDUCATION

Bachelor of Technology (B.Tech.), **Computer Science — Nirma University**, Ahmedabad, India | 2011 – 2015

ACHIEVEMENTS

- Won best architecture award from Accenture India for creating a Decentralized Petition System: bit.ly/3jStbm6
- All India 12th position from IBM Bluemix for developing an application prototype to solve the traffic problem in Bangalore city.
- Received 1st position from the Computer Society of India in a debate on iOS vs. Android vs. Windows OS.

EXPERIENCE

Senior Software Engineer

May 2022 – Present

Intuit, Bangalore, India

- Full-Stack Developer in the AI, Data & Analytics org, building data-reliability and lineage platforms.
- Built **AI Agents & MCP (Model Context Protocol) servers** exposing data and tooling to LLMs to enable agentic workflows over the data platform.
- Built a real-time marketing data attribute tracking system measuring data quality, health metrics and end-to-end lineage across hundreds of Hive tables and Kafka topics.
- Developed Kafka-producer-powered SDKs feeding dozens of processing systems, tracing lineage from source tables through the data lake to analytics dashboards.

Senior Software Engineer

March 2021 – May 2022

Bayer, Bangalore, India

- Architected an event-driven system using AWS Lambda, SNS, SQS, Kafka & Postgres DB.
- TDD using React & Testing Library in a DevOps environment.

Software Engineer 2

Dec 2018 – March 2021

AirAsia, Bangalore, India

- Worked for 2 LOBs, Hotels and Flight Check-in, and built micro-frontends and microservices serving 1 million+ monthly guests across 10+ countries.
- Grew company revenue 1% by developing an ancillary, meals for AirAsia.com.
- Developed Offline app POCs using Service Workers, IndexedDB & Cache API.
- Architected microservices for Chatbot AVA, resulting in 80% customer satisfaction and reducing call-centre count across the globe.
- Implemented Web Accessibility, enhancing usability and increasing revenue.
- Implemented automated deployment of 30+ microservices using GitLab CI.

Full Stack Developer

Jan 2018 – Dec 2018

Times Internet (Willow TV), Bangalore, India

- Developed a streaming platform using SPA / SSR architecture with Vue.js (Nuxt), Vuex, Python (Flask) & AWS Lambda, adding 20% new viewers.
- Built a search feature for 5K+ cricket videos using Algolia.

Full Stack Developer

Feb 2017 – Jan 2018

Mantra Labs, Bangalore, India

- Developed a Learning Management System for a leading Ed-Tech company serving 2 Lakh+ students daily using SPA architecture with Angular 8 and ngRx.

Co-Founder

June 2016 – Feb 2017

EventQ, Bangalore, India

- Architected the SmartQnA app to surface top crowd questions in seconds.
- Launched at 20+ conferences/seminars within the city and remotely.

Programmer Analyst Trainee

Sep 2015 – Aug 2016

Cognizant, Bangalore, India

Intern

April 2014 – June 2014

Indian Institute of Management, Ahmedabad, India

- Conducted research on sentiment analysis & built a tool to detect sentiment from text using JavaScript.
